3/23/78

Dear Jim and all the other Tagues,

If Judy sent the clippings they have not yet come.

The reasin I write is that Professor David Wrone of the University of Wisconsin, Stevens Point branch, was here for a couple of days. That is where I'm ~~desig~~ depositing all my records. He will be in charge. When he can he works at getting them in order and available. He also has some students who are engaged in special study projects.

He wanted a copy of your affidavit, not only to have in the archive but because two students are engaged in a special project about your importance and that evidence. I looked to get a copy and lo! I don t have one! I guess I sent you my only copy. So if you would please send each of us a copy we'd both appreciate it.

His address is Department of History, Univ. Wisc., Stevens Point, Wisc. 54481.

He would also like a picture of you, preferably of you standing about where you were at the time of the assassination. This also is for historical record.

He is compiling what are called oral histories. These are recorded interviews with people, to preserve their recollections. While I doubt there is anything you can say that you have not said already, it it is a different form and it is the general practise. We spent hours doing this.

If you are willing, with advance arrangements it can be done by phone.

Little new here. That I stay too busy is not new. I rush through this to be able to take a walk before the mail comes and I have to go for my regular bloodtest. With a break in the weather I can walk without getting too cold and that is not as boring as exercycling. Of which I did six miles at 15 mph earlier this a.m. Not too bad for an old man!

Best to you all,
